THE ORIGINAL CINCO DE MAYO

From the amazing food to the entertainment by the local folkloric team, it was a marvelous night full of family fun. Parents came to support their children as they learned their history from a Latin@/Chican@ perspective. The students got the opportunity to meet Dr. Hayes-Bautista, a professor from UCLA, who narrated the play and discussed his new book.

VC LULAC DISTRICT MEETING

This month's district meeting focused on learning strategies for fundraising and goal setting. The students were able to practice their public speaking by discussing the ways they can work on youth development and get the youth more involved

PARENT NIGHT

There is this perception that Latino parents are not involved in their children's academic activities and do not care about their children's academic success. What happens is that it goes unnoticed, and after speaking with the parents we were able to see that they do care and many aren't given the proper information about the A-G requirements.

UBCI COMMUNITY DAY

Our students had the great opportunity of learning the importance of giving back to the community. During community day, they helped out at a resource fair with passing out information to the community about housing, careers in energy, health, and education.

RIO MESA HS FUNDRAISER

The heat did not stop our students from getting together and fundraising at the Rio Mesa Carshow. Through the process of fundraising they learned how to organize as a group and communicate with one another. After several meetings between deciding on what to sell and the prices, they were able to come together as and agree on important decisions.
