BEACH CLEAN UP & FAMILY BBQ

Starting our first friday field trip of the summer academy with helping out our community by doing a beach clean-up. many parents and students came together to clean our precious beaches. We closed the clean-up with a delicious BBQ with the help of some parents and staff!

PEPPERDINE UNIVERSITY & S.A.T INFO SESSION

For our next trip, we drove down the coast to Pepperdine University in Malibu, CA. With gorgeous views and the beach nearby, the students sure did not want to leave! Lastly we had an educational information session with an SAT Prep expert Ms. Laura Orozco.

UC SANTA BARBARA CAMPUS & ZOO VISIT

After some hot weather, we went up the coast to UC Santa Barbara for a campus tour. Whether students had gone already or not, they learned more information about the campus and were able to have Q & A's with students. Lastly, a trip to the Zoo was what was needed to unwind.

USC & SCIENCE CENTER

One of this summer's biggest trip was our day trip to Los Angeles where students were able to visit the University of Southern California, explore the science exhibits of the California Science Center, and take public transportation. They learned the history of how USC came to be as well as the tuition of when it first started and how it has come along way. At the science center they were able to see how is it that gravity and water contributes to our every day lives.

SUMMER ACADEMY AT CSUCI

Students attended a 6-week instructional program held on the campus of California State University Channel Islands. There they were able to take preparatory classes each student will take in the upcoming school year as well as STEM activities to get their mind thinking

LULAC NATIONAL CONVENTION - PHEONIX, AZ

Students who participated in our Summer Academy were fortunate to have the opportunity to travel to Phoenix, AZ and attend the LULAC National Convention.

This 6-day trip included various educational workshops, career building opportunities, leadership development activities and speeches from influential representatives geared to inspire and uplift young Latino students through their efforts in their education.

Each student left from this experience with great knowledge to continue their education and the motivation to keep going in life.
