

CIDREAM

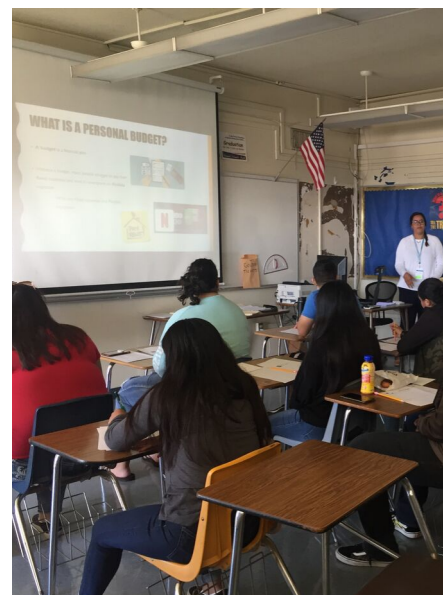

NEXT STOP: COLLEGE

It was a bittersweet day for all us. All of our seniors students graduated from high school and ALL will begin college in the fall. While we are sad to see them leave, we know they are in a right frame of mind as they move forward in their academic journey. We are beyond the moon proud of their success

SUMMER ACADEMY

This summer we began our second year of our summer academy at CSUCI. It is a great opportunity for students to prepare for the upcoming school year by taking courses that will benefit them. Let's not forget about Fridays, our field trip days, where many of our students explore outside of the Oxnard plains! This summer we visited an Agricultural farm, The Getty Museum, Aquarium of the Pacific, California Oil Museum, and the 2019 LULAC National Convention in Milwaukee, Wisconsin. At the convention the students toured Marquette University, attended workshops and the Expo focusing on career development, health, going to college and 2 of our students had the opportunity to ask some of the presidential candidates questions.

OUR FINAL SUMMER DAYS FOR 2019

As we wrap up the summer academy, the students were recognized at the 2019 LINESC Oxnard Awards Recognition Banquet. From Perfect Attendance, to Most Academic Improvement and Exemplary Citizenship. The celebration recognized every student who strives to go beyond average and reach higher. Among the highlights of the celebration were two presentations by the students. One of them having to do with the book "Always Running" and the recitation of the poem, "I am Joaquin". The students also showcased their art, in which they were able to express who they are and where they came from.

The last excursion for the summer was the Good Grades Educational Enrichment Field trip. The 2018-19, 9-12 grade students who participated in the field trip worked extremely hard in maintaining ALL their report card grades above a C. Most held A and B averages. According to a recent NEA study, they found that, "89% of students said educational trips had a positive, lasting impact on their education and career because the trips made them more engaged, intellectually curious and interested in and out of school."

What did your parents teach you about money? Did they tell you "cuida tu dinero" but they didn't tell you "how" or what that meant.

Our students at Channel Island High School learned practical money skills, money management, and student loans and debt. It was a morning well spent on financial literacy.

STEAM Wednesdays

Over the summer, a few of our students spent every Wednesday evening helping teach students who were physically challenged or with special needs to think critically and to develop real-world solutions through an engineering and design approach.
