Virtual Summer 2020 Edition

BE THE CHANGE!

With the different issues and emotions in today's current events we celebrated a safe space virtual circle to confront, explore, share and learn about Black Lives Matter and affirm that we are one in this struggle for true equality and equity in America. What a privilege to listen to presenters who consisted of passionate digital storytellers and content producers in the black and brown communities, an academic researcher from the University of Minnesota and examining how digital media is affecting the way we see one another and the impact social media has on young people, and a hip-hop artist, author and educator who's spoken word set to music and powerful imagery entitled from Migration to Graduation is transformative and reflects the story of many of our students who joined him.

"THEY MIGRATE WE GRADUATE" BY OLMECA

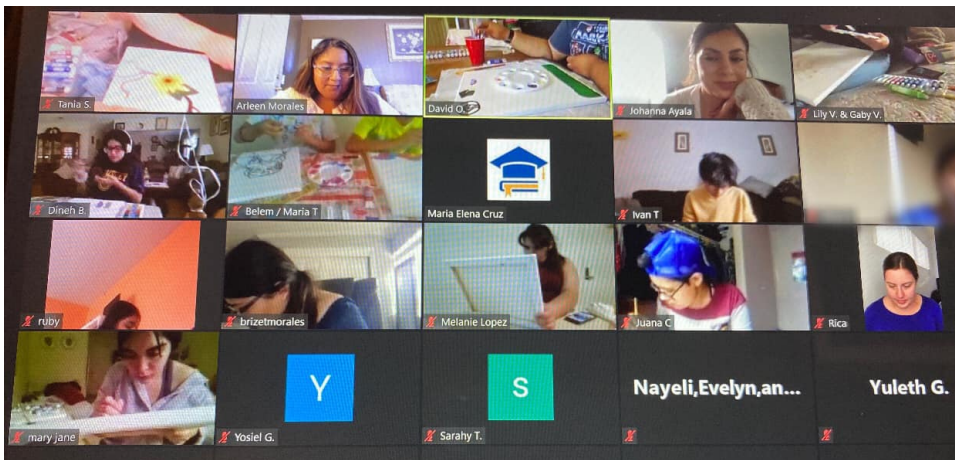

AS WE GO ON, WE REMEMBER, ALL THE GOOD TIMES WE HAD TOGETHER

As per other years, who knew this one would be different. No walking ceremony, instead it became a multi-day celebration for the class of 2020.

Together we can" and that's something we instilled in our students. After many laughs, cries, and memories together it was time for our seniors to leave the nest and venture out into college. It was such an amazing experience to be able to see our students come pick up their last senior activity and gift.

A monumental celebration of sorts. Huge success to the students who persevered in high school and especially their senior year. This is a display to our community of promise. This is their parade. One for the books. Congratulations to the Class of 2020 at Channel Islands High School. Best of all to the Upward Bound students.

ARE YOU READY?

College Workshop Series

As the alumni fly the coop, it is important for them to receive information that will benefit them as they enter college. The workshops covered college life, handling stress in college, studying tips, opening a bank account, building credit, budgeting their finances, and applying for taxes. Important information for first timers being on their own.

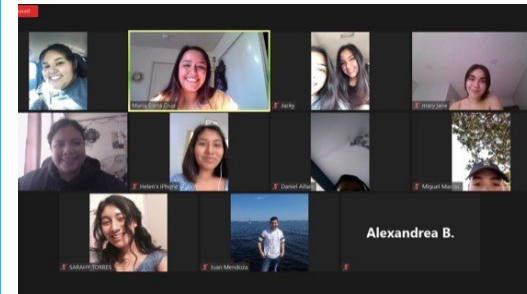

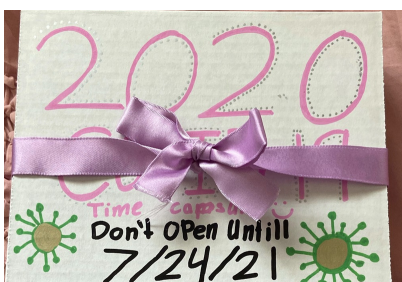

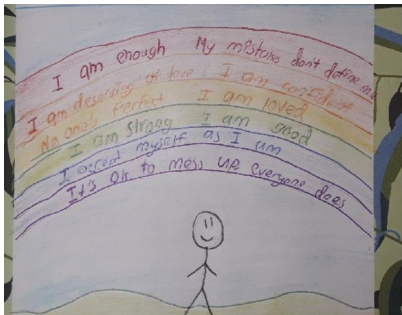

VIRTUAL SUMMER

After months of preparation, the summer program was a huge success. For the past six weeks, students took prep courses in Math, English and Spanish via asynchronous virtual learning environment.

Virtual Fridays, consisted of videos and activities pertaining to insightful topics the students learned about: social change, stem, mental health, and the importance of education. During this time of uncertainty and stress, it is important that we take care of our mental health, our well being, and never quit when we experience challenging times

Our bid farewell to our students for the rest of the summer break. Some of them will be leaving us for college all the way from Berkeley to New York City. The remaining students will begin classes in an unfolding period of time as school districts continue to lay out distance learning plans for fall. We ended our 2019-2020 school year And summer program with a BANG!.

JUMPSTART YOUR SENIOR YEAR!

Students engaged in a presentation to better assist them with the college application process, scholarships, financial aid, and prepare for the rigor and deadlines of senior year. mission process.
